

FOR IMMEDIATE RELEASE

Integrum's Smart Move to Google Cloud

Sydney, Australia – 3rd May 2021 integrum Management Systems has selected Google Cloud and Offis as partners to host its cloud environment on the Google Cloud Platform.

[integrum](#), an Australian based company with global customers, provides the world's leading and most comprehensive risk, compliance, and business optimisation platform.

Trusted by the blue chips for integrated management systems for Governance, Risk & Compliance, Safety, Health, Environment, Quality Systems, integrum helps businesses of all sizes streamline their processes, reduce risks, and accelerate business growth. Used in over 200 countries with over 1,500,000 licensed users integrum is a multi-award-winning world-class software solution.

“Hosting our risk management software platform on Google Cloud has accelerated the speed of our business, with significant performance improvements” says Grant Steenbergen (CEO) of Integrum Management Systems. Mitigating risk, ensuring compliance, and turning data into decisions at high speed is vital for our international clients who require robust governance and velocity across their organisation and ecosystem partners” he added.

Big data relies on a secure, highly available cloud platform and solution provider. “Offis was willing to go further than any other cloud solution provider. They have worked fast and diligently to successfully transition integrum onto Google Cloud,” he said.

“integrum needed a professional response to move it's IT environment in a short timeframe in Australia and internationally,” said Craig Allen, Chairman at Offis. He continued. “Our SMART Move solution meant building the new environment in hours, not days. By using Offis developed scripts, in essence, integrum mitigated it's cloud migration risks without compromising business continuity or business outcomes.”

As a Google Cloud partner, Offis provides businesses smart cloud solutions to assist them with cloud migration, application modernisation and full digital transformation.
