

Offis partners with Google Cloud to migrate and modernise Small and Medium-sized Enterprises (SME's) on Google Cloud Platform.

Sydney, Australia – May 21, 2019 – Offis and Google Cloud today announce a new partnership to assist SME's to migrate their information technology (IT) infrastructure and modernise their business on Google Cloud Platform.

“Small and Medium-sized Enterprises are regarded as the engine room of Australia's economy, and major drivers of employment and innovation. They require an agile, secure cloud infrastructure to support their digital transformation. Google Cloud Platform provides this, allowing enterprises to focus on growing their business, not keeping the lights on” said Craig Allen Executive Chairman at Offis. “Offis is committed to providing our clients a platform for growth and innovation.” he said.

Offis and Google Cloud will work together to assist SME's to move legacy on-premise systems, outdated applications and workloads onto Google Cloud Platform. Offis selected Google Cloud Platform based on its ease of use, cost saving, risk reduction and the quantifiable value it brings to Small and Medium-sized Enterprises.

Google Cloud delivers a secure, open, intelligent, and transformative enterprise cloud platform. Their technology is built on Google's private network and is the product of nearly 20 years of innovation in security, network architecture, collaboration, artificial intelligence, and open source software. They offer a set of tools and technology across Google Cloud Platform and G Suite that help bring people, insights, and ideas together. Customers across more than 150 countries trust Google Cloud to modernise their computing environment for today's digital world.

About Offis

Since 1997, Offis has designed and deployed thousands of hosting services for some of the most iconic brands in Australia and around the world. Today, as a leading Australian Multi-cloud Service Provider, Offis provides customised solutions and round-the-clock support across the entire multi-cloud hosting strategy—from planning to implementation, migration to modernisation and digital transformation.
